

# Biological Filtration

## Reef Filter Bio

**Advanced fluidised sand bed filter.**

- Precision engineered, and manufactured from the highest quality materials.
- Utilises the most efficient method of aerobic biological filtration available.
- Compact, space-saving design allows easy installation in most sumps.
- Can be easily incorporated with any aquarium set-up. Just connect to pump or power filter [NOT SUPPLIED] to create an advanced professional filtration system.
- Special designed media diffuser bowl ensures uniform fluidisation of filter media.
- Can also be used to fluidise other media.
- Suitable for both freshwater and marine applications.

## Reef Filter Bio

Code	Product	Suitable for (l)	Height (mm)	Footprint (mm)	Media Volume (kg)	Outlet (mm)	Inlet (mm)	Pump Required
1025	Reef Filter Bio 500	aquariums up to 500l	305	192 x 142	0.25kg* approx	25	16	Flow Rate of approx. 800l/hr at 0cm max head 1.5m
1026	Reef Filter Bio 1000	aquariums up to 1000l	450	0.5kg* approx	25	16	Flow Rate of approx. 1200l/hr at 0cm max head 1.5m	

\* Based on using marine sand
